

FLAVOURS TO EXCITE • OPTIMISE • MODERATE

Our Flavours

Scan for more on flavours

Our flavours portfolio incorporates **over 15,000 flavours** for sweet and savoury applications.

Our range of **natural flavours** are extracted or fermented from natural sources such as fruits, herbs and spices, or created by combining flavour compounds.

Our flavours are added to food and drink in small amounts to give them a specific taste or replace flavour lost during processing. They are carefully designed to excite our senses and deliver the flavours we know and love.

Our portfolio offers a vast array of flavours, specialising in Organic and natural flavours. We are able to match existing benchmark flavours, or develop bespoke new flavours to meet your briefs.

As consumers seek healthier lifestyles, there's growing demand for food that is lower in salt, sugar or fat, but still enjoyable. Our flavours can play a key role in making products taste great so developing nutritious products without compromising on flavour.

Organic & Natural Flavour Specialists
